

A diagram illustrating a coordinate system. A dark blue rounded rectangle represents the 'GLOBAL' space. Inside it, a light blue rounded rectangle represents the 'LOCAL FRAME'. The text 'Parent offset plus child offset' is written inside the local frame. To the right of the local frame, there is a yellow rectangle and a purple rectangle, both partially overlapping a blue circle. The yellow rectangle is on top of the purple one. The blue circle is positioned at the top-left corner of the yellow rectangle.
